General Questions

What is DepthCharge?

DepthCharge is a web-browser plugin that makes it easy to view stereoscopic 3d images and videos on the Internet. DepthCharge was created by VRex and is free for registered users.

What is a Stereoscopic 3D Image?

??

What 3D File formats does DepthCharge Support for the Internet?

JPEG Stereo File	Extension: JPS	Lossy compression format for still images based on JPEG file format standards.
PNG Stereo File	Extention: PNS	Lossless compression format for still images based on PNG file format.
VRR File	Extension: VRR	Proprietary VRex container file. Can be a still image or a motion video file.

How do I create VRR files for DepthCharge?

Currently, VRR files are in alpha testing. If you are interested, please contact depthcharge@VRex.com.

DepthCharge Licensing

Do I have to pay to use DepthCharge?

If you are using DepthCharge for personal use and you register with us, you do not need to pay.

If you want to integrate DepthCharge into a product, distribute it within a commercial business, or are using it as part of a ... Then you are required to pay for each copy of DepthCharge that is distributed or installed.

Can I create a CD-ROM of 3D images and include the DepthCharge installer on my CD-ROM?

Yes. You must include the most recent DepthCharge installer and will be required to submit your product to VRex for review. You will also be required to update your cd-rom with the latest version of DepthCharge. Please contact VRex for details on bundling DepthCharge with your cd-rom.

Embedding DC Images into a Website

How do I add DepthCharge images to my website?

DepthCharge images are added to websites using the EMBED HTML tag. A simple example is shown below:

```
<EMBED src="filename.jpg" type="image/x-jps" width=640 height=480  
pluginspage="http://www.vrex.com/depthcharge">
```

For more details on embedding images into a website, see the DepthCharge developer section on our website at: www.VRex.com/DepthCharge.

Support for Other Platforms

Does DepthCharge support Macintosh platforms?

The current version of the DepthCharge plug-in only works on Windows platforms and does not support Mac or Unix platforms.
